## YOUR GLASS EXPERT

One-stop glass solution

信联玻璃

Guangdong Xinlian Glass Technology Co.,Ltd

### Partners

Insulating glass, also known as DGU, is widely used in windows and curtain walls. It is made of two or three pieces of glass bonded with a strong, airtight composite material, offering energy efficiency, sound insulation, and protection against water, frost, and fog.

## Insulating Glass

### Insulated Glass

#### Clear +XA+ Clear

basic function:soundproof, heat proof, thermal insulation, frost prevention

#### Clear +XA+ tinted

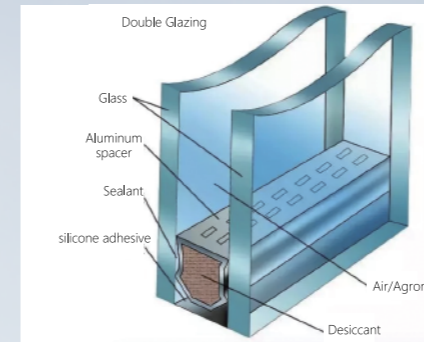

Advanced function: Basic function +shading

#### Clear +XA+ heat reflective

Advanced function+desired visible light transmission and reflection ration

#### Clear +XA+ low-e glass

Advanced function+desired visible light transmission+energy saving

Anti-sunset glare and anti-UV scene

large area used of glass, well-lit scenes, south bedroom, sunroom, bay window sill

## Applications

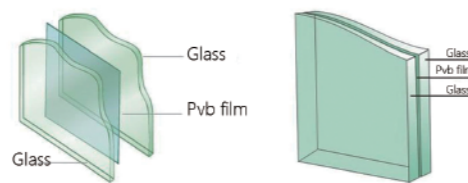

## 合作案例

## COOPERATION CASE

## Laminated Glass

Laminated glass technology bonds multiple glass pieces with special adhesive film, creating safe and high-performance glass. It offers safety, security, sound insulation, aesthetics, and furniture protection. Commonly used in railings, curtain walls, and shower enclosures.

### Laminated Glass Structure and Application Scenarios

#### clear glass+pvb layer+clear

Basic functions: sound insulation, UV protection, anti-theft and explosion-proof, etc.

#### clear glass+pvb layer+tinted glass

Advanced functions: basic functions + shading + decoration
